“Formerly Sangyo Igaku, Jpn J Ind Health”
The Journal of Occupational Health

INSTRUCTION FOR AUTHORS

(Revised October 1, 2010)

1. The Journal of Occupational Health (JOH) is published by the Japan Society for Occupational Health and intended for the publication of original contributions relevant to occupational and environmental health, including fundamental toxicological studies of industrial chemicals and other related studies.

2. Submission of a manuscript to JOH implies that it has not been published elsewhere, that it does not duplicate material already published in any language elsewhere, and that it is not in submission elsewhere.

4. Animal experiments are expected to be performed in accordance with Guidelines for Animal Experiments established at each institution.

5. The following types of contributions will be accepted.

- Originals: Articles with new findings and original research results, research methodology, research materials and interpretation of authors’ own or of other research results and articles of a similar nature.
- Brief reports: Articles with limited but original data, having the same format as an Original one.
- Case studies: Reports on cases of interest to occupational health and/or cases concerning improvement in working conditions or environment.
- Field studies: Reports on investigation into the status of occupational health at work places with relevant data. International issues can be published as articles under the heading of “Occupational Health/Safety in the World.”
- Opinions: Short articles of authors’ own opinions or comments on various aspects of occupational health.
- Correspondences: Correspondence on what has been published in JOH is welcome. Length must not exceed 600 words, only one table or figure is permitted, and there should be no more than five references. When appropriate, the journal may invite replies. The correspondence may be by peer review or may sometimes be at the discretion of the editor without peer review.

6. The Editorial Board decides whether a contribution will be accepted for publication or not.

7. If the manuscript is accepted for publication, copyright of the article shall be assigned to the Japan Society for Occupational Health.

8. Manuscripts should be prepared in the following manner. Submissions which do not conform to the instructions will be returned unread. When, however, nonconforming manuscripts have exceptional merits for publication, they can be conveyed to due process.

   1) Manuscripts should be written in English, and be typed in 10-point type with margins of 2.5 centimeters on A4 (ca. 22 × 28 cm) paper. Double spacing should be used throughout, and the right margin should be unjustified. All papers should be organized to include: title page, abstract, text, acknowledgments, references, figure legends, tables and figures. Each of the elements should begin on a separate page. Pages should be numbered consecutively, beginning with the abstract. Line numbers should be put on the left margin in each page of the text.

   2) The title page should include: a concise and descriptive title; name of each author; departmental and institutional affiliation of each author; the telephone and fax numbers as well as the e-mail address of the corresponding author; type of contribution; running title (not more than 60 letters including spaces); the number of words in the abstract and the text; the number of tables and figures.

   3) A structured abstract should not exceed 250 words, normally under the heading Objectives, Methods, Results, and Conclusions.

   4) Originals and Field studies should be limited to 4,000 words, and Reviews to 6,000 words excluding the abstract, acknowledgments, references, tables and figure legends. Brief reports should not exceed 1,500 words, and contain no more than 2 short tables or figures in total. Originals should generally use the following format: Introduction, Subjects (or Materials) and Methods, Results, and Discussion, and use subheadings and paragraph titles whenever possible. Brief reports and Case studies should be limited to two printed pages (normally, 800–1,300 words (text base) per page) including references, tables and figures.

   5) For all submissions, give a list of not more than 6 keywords in alphabetical order. The author(s) are recommended to refer to Medical Subject Headings (MeSH) selected from main headings listed in Medical Subject Headings in Index Medicus, published by the National Library of Medicine (http://www.nlm.nih.gov/mesh/MBrowser.html). Keywords will be placed after the abstract for Reviews, Originals, Brief reports, Case studies, and Field studies.

   6) Tables and figures should be of adequate quality to withstand reduction in size. Each table and figure should be submitted on a separate A4 sheet. Their location in the text should be indicated in the right margin of the text. Only 6 or fewer tables and figures are permitted in total. Each of tables and figures should constitute a single unit of communication, completely informative in itself without reading the body of the text.

   7) The following units and symbols should be used for quantities and measurements:

   a. Without reading the body of the text.

8. The style of references should follow the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (Vancouver Style) (http://www.icmje.org/). Please refer to Examples of references.

9. No charge will be imposed on the author(s) for papers up to six printed pages in length. However, charges for papers in excess of six pages will be levied on the author(s) at a rate of 10,000 yen (approximately
Color illustrations are acceptable; however, the author(s) will be requested to pay the extra publication cost.

10. Page proofs will be made available once to the author(s).

11. The author(s) will receive fifty free offprints from the journal.

12. Manuscripts should be submitted on-line through the web site at http://mc.manuscriptcentral.com/joccuphealth. When the manuscript is accepted for publication, the author(s) will be asked to submit the manuscript to the editorial office as a Microsoft Word file(s). Regarding this, the secretarial office can be contacted at joh-edit@ipec-pub.co.jp.

13. Research articles accepted for publication in JOH will appear initially as author-supplied PDF files in the JOH-in-Press section on the J-STAGE website (http://www.jstage.jst.go.jp/browse/joh/ad/pub/0_l_contents) shortly after acceptance. The PDFs will not be corrected or copy-edited. The article will be citable using the DOI (Digital Objective Identifier) code. The date the article is included on the website will be considered the publication date. This process substantially reduces time to publication after acceptance, thus enabling the establishment of priority. The final versions may be slightly different as a result of the editing process but there will be no substantive changes allowed. Any substantive changes at this stage will require an erratum to be published. Articles will be published in the print version in order of acceptance as journal space permits.

14. Questions regarding the instruction for authors should be addressed to the journal office via e-mail (joh-edit@ipec-pub.co.jp).

Examples of references

The examples follow the format of Uniform Requirements of Manuscripts Submitted to Biomedical Journals. Please refer to Index Medicus for abbreviations of journal names.

Journal article

Each reference should be written in the following order: names of author(s), title, name of journal, year of publication (Gregorian)
